EASTERN NEWS.

[BY TELEGRAPH TO THE OREGONIAN.]

New York Papers on the Elections.

The *Tribune* claims that the Democratic party was beaten in Tuesday's election by inflation as the Republicans were a year ago by Grantism and third term. The two elections prove the existence of an independent vote with power and intelligence to dictate the result in the Presidential election next year.

The *Times* replying to the *Express*, positively asserts that Grant will not secure the renomination.

The *Sun* sees in Tuesday's election the explosion and death of inflation and a great triumph for judiciary independence. Every judge has got a new backbone.

The *World* claims the Democrats won a more victory as visible as their memorable victory last year because the Democratic losses on Tuesday resulted only from the accession to the Republicans of the canal thieves.

The *Times* combats this by showing the great Republican gains in the counties having no local interest in the canal question, instancing the 4,000 Republican gain in Duchess.

New York Goes Democratic, but Elects a Republican Legislature.

ALBANY, Nov 4.—The *Evening Journal* says: Our table to-day makes the State Democratic by a majority of between 5,000 and 9,000. The Senate will stand 22 Republicans to 10 Democrats more than two-thirds majority. The Assembly foots up 72 Republicans and 56 Democrats, a Republican majority of 16. We have special advices from almost every district.

A Close Election in Wisconsin.

The Kansas Election—Opposition Gains.

The Democrats also elect a senator in the only district where there was a vacancy and also elect a district judge in Fort Scott district, being one of three [illegible]. Moody and Sankey's Meetings.

NEW YORK, Nov 4.—The Brooklyn tabernacle was only half filled this morning at Moody and Sankey's meeting. The falling off in attendance may be accounted for by the rain. After singing and the usual requests for prayer had been read Mr Moody took for his text, "No good thing will the Lord withhold from them that walk uprightly." It always seemed to him (Moody) that people came nearer to God when there were but few gathered together, and he believed they were near to Him this morning. He hoped they would walk uprightly, and, as was promised in the Scripture, nothing would be withheld from them by the Lord. Sankey then sang "Desious." Wm Richardson of Dr Fulton's Baptist church prayed for the welfare and peace, and asked for the prayers of the congregation. Moody suggested service on Sunday evening for non church goers. Rev Henry Ward Beecher was present during the services.

NEW YORK, Nov 4.—The usual throng filled Brooklyn rink this evening and hundreds were unable to get in. After singing by Mr Sankey Mr Moody preached an eloquent sermon from the text, "Seek the Lord while he is near" (Isaiah lviii). He rebuked his audience for want of earnestness and said he had grown tired of the half heartedness which was exhibited. He gave many examples of what men could do by being terribly in earnest. He closed his sermon with an account of the conversion of a [illegible] wife in Newcastle England who at first said she didn't want to be a Christian. She attended the meetings a week and then said she wanted to be and was saved. He read a letter he had received from her husband telling him she had since died, and that she had devoted the last days of her life to Jesus' work. "When I received that letter," said Mr Moody, "I thanked God that I had gone to England." After singing and closing with prayer the congregation was dismissed. An enquiry meeting was afterwards held in Simpson M E church.

THE VALUE OF GOLD.

[From the Chicago Tribune.]

The inflation people, from Wendell Phillips and Ben Butler down to the most distressed and bankrupt newspaper organ, seek to make their theory plausible by a bold denial that gold is in any sense a standard or measure of values, and they insist that its value, instead of being steady and stable varies from day to day, and fluctuates as does that of all other commodities. Hence they argue that greenbacks, being a legal tender, have of necessity a permanent legal value, while gold fluctuates, rising and falling because of its abundance or scarcity and the demand for it. Mr Kelley and his associates argue that if the law abolish the use of gold for payment of duties the demand being reduced the value of gold in greenbacks will fall.

The office of money is well understood. All commercial transactions are, substantially, cases of barter,—the exchange of a given quantity of one commodity for another. Every man who has a surplus of one thing seeks to exchange it for some other article which he needs more than the one he possesses, and whether he receive the article he needs, or the money with which to purchase that article elsewhere, the transaction is substantially an exchange of commodities, the value of each in the other being measured by the value of each in money. Money being the go between agent by which exchanges of articles are thus made, the world has by common consent (dating back to the earliest record of barter) adopted gold as that agent. There is no part of the world where gold is not received in exchange for commodities. It is the universal barter agent of commerce. A reason for this is, that it has a greater value in less bulk than other metals, that it does not decay, that it is capable of being employed in the construction of costly objects for use and ornament. It can be transported at insignificant cost compared with its value. It is the only commodity for which all men of all nations are ready to exchange their property. Its annual production is not so great as to increase its volume to the extent of exceeding the universal demand for it. The demand for gold is the volume for commodities offered in exchange for it. There have been changes in the comparative value of gold but these have been at long intervals. When America was discovered, the amount of gold carried to Europe lessened its comparative value to all other property. The reduction was slight, gradual, and general. There was another reduction when the gold discoveries were made in California, supplemented as they subsequently were by those of Australia. These changes, however, were general and applicative to the relative value of gold with all other commodities. It is a remarkable fact that when owing to any unforeseen accident, or other cause gold shall be worth more in any part of the civilized world than it is elsewhere gold will at once flow to that point even if the increased value be but a shade above the cost of transportation. The value of gold therefore, relatively to all other commodities is the same all over the world. It will purchase native products at or near the cost of production, and will purchase these same products in all other parts of the world at the same price with the addition of cost of transportation and the incidents of trade. It will buy coffee at any place of its growth, and will buy the same coffee at the same price, adding thereto the cost of moving it from where it was produced to the place of sale. The value of wheat in gold at Liverpool fixes the value of wheat in gold at the farm in Illinois where it is produced. The price of cotton in gold at Manchester fixes from day to day the price of cotton at Charleston, New Orleans, New York, Cairo, and Calcutta.

But it is argued that because a bale of cotton on one day is worth more in gold than it is on another day, that therefore the value of gold, compared with that of cotton, rises and falls; and that because wheat sells per bushel on one day for more in gold than it sells for on another day, the gold has no fixed value but that its purchasing power in cotton or wheat rises and falls and fluctuates as does that of other commodities. If wheat and cotton were the only commodities having a value to be measured in gold this argument might have some plausibility. The price of cotton if measured by the weight of wheat to be had in exchange for it, would exhibit a wide scale of fluctuation, both are produced in surplus and the price obtainable is just what the exigencies of the purchasers may happen to be. Cotton may be exchangeable in wheat at a certain proportionate weight in one place and at a greater or less rate at other places. In wheat growing countries, it would require more grain per pound in exchange for cotton, and where there was a demand for grain the latter would purchase proportionately more cotton. The relative values of these two articles would depend on the quantity of each in market or to be had and gold would represent the value of each in the relative value of all other exchangeable products.

COMMISSIONER SMITH ON THE RED CLOUD REPORT.—Hon E P Smith commissioner of Indian affairs, in conversation concerning the report of the Red Cloud Commission calls especial attention to one feature of it, which is that during the period of two years' time covered by the investigation of this commission the disbursement of funds at that agency has amounted to over $1,300,000. He says the commission composed of five eminently practical and competent business men after a search of ninety days most of which were spent in the Indian country, find, as the result of an investigation the thoroughness of which no one will question that successful frauds have been perpetrated resulting in a loss to the government not exceeding from $4,000 to $7,000 and this by one man out of a large number of dealers and contractors, and in a disbursement of over $1,250,000 which has hitherto been regarded as the *terra incognita* of the Bureau and which offers larger facilities for the concealment of fraud than any other portion of the Indian country.—*N Y Herald*.

Clear and round dealing is the honor of man's nature, and a mixture of falsehood is like alloy in coin of gold or silver which may make the metal work the better but it embaseth it; for these winding and crooked courses of the doings of the serpent which goes basely upon the belly and not upon the feet.—*Bacon*.

There is as much greatness of mind in the owing of a good turn as in the doing of it and we must no more force a requital out of season than to be wanting in it.—*Seneca*.

I look upon an able statesman out of business like a huge whale that will endeavor to overturn the ship unless he has an empty cask to play with.—*Steele*.

PARTICULARS OF THE VIRGINIA CITY FIRE.

VIRGINIA CITY, Oct 27.—The fire began in a small lodging house kept by Kate Shay alias "Crazy Kate," a woman of ill repute, near the center of the city, half between Taylor and Union streets, on A street. A neighbor saw an unusual light, entered the house and found a room next to Kate's in flames. He believes it caught from a candle left burning such being her habit.

THE CATHOLIC CHURCH BLOWN UP.

Giant powder was now placed in the interior of the Catholic Church and it was blown a hundred feet into the air, leaving the bare walls standing. This was done to stop the scattering of great cinders which were flying from its roof in all directions. Now the fire fiend shrieked with vengeful delight and marched conquering on. The flames rose hundreds of feet in the air and the heat was so intense that adamant would melt before it like tissue paper in a flame. Goods removed to the street caught fire and were consumed. Merchants threw open their doors and told people to help themselves to clothing and groceries, as nothing could be saved. It was now eight o'clock, and the scene beggared description. The streets were filled with people. Teamsters were struggling through the fire fighting at presentable points, women were shrieking. Their cries of despair, curses of enraged men, roar of flames, dull reports of explosions as building after building took fire, a heavy thud and crash falling walls, the snap of bursting iron bars and doors, the howl of the gale—all went to make up a scene of indescribable horror.

A GENERAL CONFLAGRATION.

It was now seen that the wind was shifting easterly and northerly, and on B street near Carson street the flames suddenly veered away right in the midst of a long row of wooden cottages leaving half of them unharmed. Down went the monster toward the residences on C street crossing Carson street and following up the grade northerly half a block, where it turned due east and swept on almost to the cemetery. Here the wind suddenly chopped square round, and with a wild embrace of a fine dwelling standing alone the conflagration ended on the northeast. Meanwhile the flames marching down Taylor street on the south, passed across D street and on to G street, swallowing up churches and residences and aiming for the mining works just beyond. By 9 30 A M it was seen that these could not be saved. The men were ordered from the shafts, the cages pulled up and filled with earth and the buildings abandoned.

THE CONSOLIDATED VIRGINIA WORKS.

By 10 A M the Consolidated Virginia hoisting works, building and mill, costing $1,500,000, were wrapped in flames and soon fell. The new California stamp mill then fell a prey to the maddened element, and it marched to within a few rods of the C and C hoisting works, when the veering of the wind mentioned checked the flames. But they rolled on southerly, and in maddening glee sent great tongues of flame to lick up the Ophir hoisting works which soon fell in. The shaft took fire and burned down two tiers of timbers, when the streams were got on and the shaft saved. Water is still kept on the shaft. Meanwhile more explosions were heard, as building after building blew up. Some explosions made the earth tremble as though by an earthquake, shattered windows far off and knocked down shelving and crockery. By 11 A M it was evident that the flames had spent their fury. The wind whirled, twirled and gusted about fitfully, and then, as if satisfied with the work of its ally, it died away and left a bed of smouldering ruins, here and there burning up between brick walls still, three-quarters of a mile long and a half mile wide.

Nearly all the residences were wooden. Nearly all the best business houses were brick or stone.

THE SCENE AT NIGHT.

When night closed in what scenes were here! Fortunately shelter was ample in the remaining houses for the women and children but they all suffered with cold. Hundreds of men walked the streets all night. The militia were called out to prevent lawlessness, and large numbers of special policemen sworn in. However general good order was observed.

CASUALTIES.

Two men were killed during the fire. J Kelton of Gold Hill was killed by the falling walls of the Carson Brewery and two citizens were bruised by a falling wall. An unknown drunken man entered a bookstore and began throwing things about. He was warned to go out, but refused when rafters fell upon him and crushed him. His body was consumed in the flames and only his charred remains were got out. A score of horses were burned in their stables. Eagle Engine No. 3 and Knickerbocker No. 5, were both lost, being caught by the flames and cut off.

THE TERRITORIES.

J C Horr has been appointed agent for Wells Fargo & Co at Olympia.

Horse stealing is said to be the safest business a man can engage in at Laramie. It is also lucrative.

Large numbers of cattle are being shipped from Cheyenne to Chicago, over the Union Pacific railroad.

James Clellan, councilman elect from Fremont county, Colorado, who is an old plainsman, once rode a horse 190 miles in two days, pursued by redskins all the way.

Dr Harris, of Laramie, who was elected a member of the Wyoming legislature, has resigned and Governor Thayer has ordered a special election to fill the vacancy.

John H Timmon has laid out a town at what is known as Timmon's Landing on Lewis river Clarke county W T. The new town has been christened "Lacenter."

Advices from Fort Laramie say that "California Joe" of Denver and a company of 400 adventurers, have reached the South Cheyenne river and are pushing on for the Black Hills.

Moffett, the defaulting treasurer of Park county has according to the *Sentinel* left the country, leaving behind him a lot of bondsmen, who, with one exception are irresponsible.

Joe Wright and Bill Long tried to escape from Alma, Park county, Colorado, on two jacks which they had stolen from a Mr Putnam. The owner pursued them and recovered the donkeys and thrashed the thieves until they will hardly be able to effect their escape on foot.

Four miles from Quartzburg, Boise Basin, are the Canyon creek mines where last week a miner rocked out $300 from the decomposed quartz he had secured by a few days' work in the new claims and then pounded out thirteen pounds of the ore, which yielded at the rate of $132 per ton. Much of that which is taken out goes as high as $10 to the pan.

The Lacenter Hall and Store Company, of the Patrons of Husbandry, have erected a grange hall at Timmons Landing on Lewis river Clarke county W T which they will dedicate with a grand ball on the evening of the 3d of December next. A cordial invitation is extended to all who may wish to spend a pleasant evening, the proceeds of the evening to be applied toward procuring a library for the grange. Good music will be in attendance and a bountiful supper will be prepared.

Prof Jenney told a reporter of the Cheyenne *Leader* that the gold bearing belt of Harney Peak district is about fifty miles long, and will average twenty miles wide. The diggings prospected are not extraordinarily rich but will pay good wages and are what California miners designate as poor men's diggings and will pay from $4 a day upward. The richest gold deposits were found in Bear Lodge district. The gold found was of a very fine quality assaying 993 fine and worth $19 43 an ounce in coin. It is the opinion of the professor that the gold diggings are sufficiently rich to furnish employment for labor and capital for years, which will lead to the development of whatever other resources may exist in that region.

FRIDAY MORNING NOVEMBER 5 1875

THE FIGHT AGAINST TAXES

It has been said to truest patriotism and the highest statesmanship is to fight taxes. While this is not to be accepted without a qualification, with certain exceptions in all emergencies it is in general correct. There is less difficulty in the matter of getting government enough than in getting it cheap enough. The tendency is to too much government at vastly too much expense. There ought to be less expense per capita in governing and protecting a large population than a small one. But there is not, as experience is daily demonstrating. In this country national taxes grow no less and State county and municipal, in the average of a series of years increase. Our law makers are continually deploring the increase of taxes and continually failing to put a check upon it. Occasionally as in the case of the last legislature of Oregon an effort is made in good faith to reduce the burdens which the people have to bear, and something is accomplished in the way of a beginning, but ordinarily the reform is spasmodic and ephemeral and the old process of multiplying salaried offices increasing salaries engaging in extravagant enterprises at the public expense, and in general devising ways and means to get money out of the people at large is reinstated.

Such a reform is needed in this matter as will go to the very foundation of the political system of the country. Legislators should be chosen with special reference to it, and should then be held to the most rigid personal accountability for the faithfulness and fearlessness of their labors. Such selections can be made only by the people. The professional politicians are interested against such a reform and can no more be trusted to carry it out or to select legislators who will carry it out, than any other class of men can be trusted to act against their own interests. *The people must fight taxes or the fight will not be made.* And if they would be successful, they must begin at the bottom. They must control the nominations of all parties, since it is impossible to discard the system of nominating conventions. They must see to it that the people and not the professionals are represented. If this were done not once, but often enough for the perfecting of the plans of reform which are undertaken all sinecures and supernumeraries in office would soon be cut the machinery of government would be reduced and simplified, the country could return to its old rate of 8 or 10 mills taxation. Here, in Oregon, while our State government is by no means so expensive as those of many of the States, it is far more expensive than it need be. It is a good while till the next election but is none too soon to commence the agitation of the subject of further reforms in the direction of economy of State administration. What was so well begun last year should be pushed forward next year, and to push it, the work to be done by the people should be commenced at once.

MOODY AND SANKEY

The religious work of Messrs Moody and Sankey is truly marvelous, taking rank among the great social movements of the times. Their success in London was all the more remarkable because it was in London. It had not generally been supposed that the English people were so susceptible as the Americans to those peculiar influences which ordinarily appear as agencies in bringing about religious excitement. But the crowds that day and night thronged to the place where these distinguished evangelists held forth contradicted that notion. Then they came back to America directing their first attention to Massachusetts, where despite the traditional religious tendencies of the people they had rather a cool reception. The world, the flesh and the devil combined against them and they had not such extraordinary success as among the staid churchmen of "famous London town." Then they marched on Brooklyn and took the city by storm. The largest hall in the city, the skating rink was secured, but was insufficient to accommodate a third of the people who came out to hear the revivalists. The streets adjacent were filled from the first day with eager people who, having no hope of gaining admission to the hall remained outside in order to get a sight of the two men as they went away. It is estimated that 12,000 are in attendance at some of these meetings. Of course the gospel of gush in which the Brooklyn people have been educated, is an excellent preparation of the ground for Moody and Sankey, but that does not suffice to account for the power of these remarkable men.

Their next point of attack is Philadelphia. Whether they expect to clean Brooklyn before they move upon Philadelphia has not transpired. If they do Philadelphia, we opine, will have to wait a good while for their appearance notwithstanding the unprecedented rapidity with which they do their work.

Sankey is represented as possessing the most powerful and the most mellifluous voice ever heard in this or any other country and his singing is said to exert almost as great an influence over an audience as the preaching of his fellow laborer. Moody is not an elocutionist in the ordinary sense of that term, as he resorts to none of the arts of the elocutionist. He is simply a most earnest and urgent speaker who believes in the truth of what he says, and is perfectly saturated through and through with a sense of its importance. He speaks so rapidly that no phonographer can take down his sermons verbatim. One would naturally suppose his audience would find it difficult to follow him in his rapid and impassioned delivery but such is not the case. The greatest difficulty they have to contend against seems to be to keep from losing all control of their emotions and forgetting the proprieties of the occasion.

MORE OF THE JOURNAL'S RECKLESSNESS

The *Fremont Journal* assails Mr Leander Holmes in one of his articles in the OREGONIAN, and goes out of its way to insinuate that there was something wrong in Mr Holmes' official conduct as U S District Attorney for Washington Territory, in connection with the matter of settlement with persons charged with cutting timber on government lands. The *Journal* hints at addition division and silence as something with which Mr Holmes was improperly familiar in this timber matter. The truth is Mr Holmes took no steps in that matter except under the explicit instructions of the Commissioner of the General Land Office, dated the 6th of October 1866, and the money collected by him was deposited to the credit of the government at its designated depositories and he holds to-day the duplicate certificates of deposit therefor, amounting to near $15,000. His accounts were all rendered and were never questioned. Besides there was a judicial investigation of them in a civil suit and not an iota of evidence was shown affecting his integrity. Had he been disposed to steal the opportunity was presented for had he failed to account for half the money he collected on the timber account no one need ever have been the wiser. There is neither justice nor policy unless we greatly mistake, in any newspaper's making such reckless charges as this which is now brought against Mr Holmes.

THE PEOPLE GETTING READY FOR 1876

It appears very much as if the turning of the tide of public sentiment in favor of the Republican party is not attributable to the currency question alone. In Pennsylvania, where the parties stood as in Ohio on that issue, the result is a decisive victory for the Republicans. But Pennsylvania is a pretty reliable Republican State, and the majority by which the Republicans carried their State ticket last Tuesday is no larger than they would have had a right to expect if there had been no new or peculiar issue to influence the election. So Pennsylvania can hardly be said to have gone Republican merely because the people were opposed to the inflation resolution in the Democratic platform. It went Republican because it is a Republican State.

New York is conceded to the Democracy but by a majority so meagre when compared with 50,000, by which Tilden was elected over General Dix, as to have the moral effect of a defeat. And here both parties stood squarely for hard money and condemned every scheme for inflation of the currency of the country. The immense Republican gain in that State cannot be accounted for upon any special issue—any issue except the general one of Democrat and Republican—and that is an extremely difficult issue to define. The indications are simply that a large portion of the people who had been lately suspicious of the Republican party have come back to its support.

We do not believe this means that party lines are to be drawn as straight as they were before the uprising of the people nor that the party lash can be wielded hereafter as effectively as it was wielded before the people rebelled, but it does mean that in a contest of national importance the people are with the Republican party, and that they are preparing to elect a Republican President in the Centennial year. Unless some great mistake shall be committed by the party managers between now and the Presidential election next year, it is pretty safe to predict that Grant's successor will be a Republican, and will be elected by a splendid majority.

"ARE YOU GOING TO PAINT?"

GILROY March 1, 1875

TO WHOM IT MAY CONCERN: In an experience of three years with the Averill Chemical Paint, more than one half the jobs have chalked, peeled or cracked notwithstanding the Paint was warranted to do neither and out of sixteen failures, the California Chemical Paint Company have refused to furnish Paint to repaint but six of the sixteen. I refer to the following houses that have cracked peeled and chalked in this place: James Cross, H C Morey M D, Thomas Darrough, F J Bryant, J H Farmer, Frank Oilham, J H Trilby, G W Ward, Thomas Rea, F Ball, D Whitney, William Wilson, J M Finfrock, F B Hitchcock, J A Baxter, Music Hall, Catholic Church and I might mention many more.
J B RHINEHART Painter

Post St SAN FRANCISCO Sept 11 1874

To Pacific Rubber Paint Company—Gents: I had my house in Oakland painted with your paint. It was warranted to be good and satisfactory in every respect. I was obliged to have the third coat put on to make it look as if it had been really painted and even then I think one good coat of Lead Paint would have given the house a better appearance. I think you ought to make up to me the loss I sustained besides the annoyance I felt knowing that an inferior article had been put on when a No 1 article had been promised. Hoping to hear from you soon on the subject I remain

GILROY Sept 4 1875

To whom it may concern: Seeing in various papers that the California Chemical Paint Company continue to deceive people by saying that the Averill paint will neither peel crack nor chalk off I deem it my duty to say that my house painted with the above named paint in the fall of 1873 failed in less than eighteen months after being painted by peeling cracking and chalking off in the worst manner imaginable. I also observe that the Company have my name in their printed matter as a reference; this was done without my knowledge or consent.

GILROY March 18 5

To whom it may concern: My house, painted with the Averill Chemical Paint in June 1873 failed in a little over one year after being painted by chalking peeling, wasting and changing color some light color some dark. The California Chemical Paint Company are knowing to this, and yet continue to deceive the public by saying that the Averill Paint will not peel crack or chalk.

GILROY Sept 4 1875

To whom it may concern: My house painted with the Averill Chemical Paint manufactured by the California Chemical Paint Company of San Francisco about two years ago failed in less than one year after it was painted by chalking off and changing color and I had a portion of it repainted.

GILROY Sept 4 1875

To whom it may concern: I had my fence painted in the fall of 1873 with the Averill Chemical Paint which was represented not to chalk peel or crack off, but it chalked off in three months after it was painted.

FRIDAY MORNING NOVEMBER 5 1875

CITY.

ARREST OF SUPPOSED STAGE ROBBERS.—Mr J. A. Pruett sheriff of Umatilla county informs the evening cotemporary that the supposed stage robbers were arrested several days ago, and are now undergoing examination at Pendleton. The circumstances of their detection and arrest, directed by Col H C Paige, Wells, Fargo & Co's agent are about as follows: One of the supposed robbers by the name of Maxon, came into Weston a few days prior to the time when the stage was stopped and traded a horse with a stable keeper there. The horse he received was newly shod all round at his direction. After the work performed by the blacksmith was completed, Maxon purchased a lot of provisions, and started off with the statement that he was bound for Vancouver direct. After the robbery had been committed, and when heavy storms had been raging in the mountains for two or three days, Maxon accompanied by another man by the name of James Berry, who is said to be very respectably connected in Walla Walla valley returned to Weston. It was quite evident from the general appearance of the men that they had been driven into town from the mountains by bad weather, and from the fact of their strange and sudden appearance from an uninhabitable region the new shoes having been removed from the horse when the animal most needed them to retain a foothold the man purchasing a pair of boots and hiding his own shoes, (the shoes fitted the tracks made by one of the robbers at the scene of the robbery) and the stay a few days before pleading poverty now flush with money, led those in search of the robbers to believe they had found the highwaymen, and the sheriff proceeded at once to arrest them. They were at once confined in the jail at Pendleton and the trial had progressed far enough to develop the points given above.

FOUND GUILTY.—Yesterday afternoon the attention of the State circuit court was occupied in the trial of the two lads, Johnny Dougherty and Charles Carroll who are charged with the crime of larceny from a dwelling in connection with George Connor and Willie Reynard. After a short deliberation, the jury returned a verdict of guilty as charged in the indictment. Fair and impartial trial have been had, convictions secured in the case of each of these defendants and nothing now intervenes between the lads and the penitentiary. All that remains for the court to do is to pass sentence against these boys and the doors of the penitentiary will close on them, except something is done by our citizens at once toward establishing a reform school. Should such an institution be founded, these youthful offenders can easily be transferred from the penitentiary to the reform school. All right thinking persons must admit that while it is neither proper nor right to permit such bad boys to run unrestrained about the streets, yet offended justice scarcely warrants the incarceration of lads of such tender years in the penitentiary. Mr Thompson, the district attorney, as a sworn officer of the law had no alternative but to prosecute these boys and under the evidence the jury could not consistently do otherwise than to adjudge them guilty. Whether these lads are to be committed to the State's prison or sent to a reformatory institution will depend solely on the [illegible] action of our citizens with regard to the subject of establishing a reform school. Where shall these children be sent?

BRUTALLY ASSAULTED.—A Chinese lad named Ah Duck was set upon yesterday by a boy [illegible] Elkeles who drives an express wagon, and brutally maltreated. Elkeles, while standing near the corner of Alder and [illegible] streets, threw a stone at the boy which came near hitting him. Ah Duck picked up a stick with which to defend himself and prepared to stand on the defensive. Without the slightest provocation Elkeles hurled another stone at the lad, who did not escape so fortunately. The missile struck him square in the forehead inflicted a deep gash and knocked him senseless for a few minutes. Seeing what he had done, the young ruffian took to his cowardly heels and ran away. Complaint was filed at police court against Elkeles, and the officers started after him but the young hood [illegible] had made his escape and up to a late hour last evening had not been arrested. Elkeles is [illegible] disposed and has a bad reputation.

[illegible] ON FOOT.—Mr C. B. Ferry, who formerly lived in Portland but for the past [illegible] years past has been a resident of Tacoma, is now in San Francisco en route to Washington, where he expects to remain during the coming winter. We understand that Mr Ferry has been indefatigably engaged in working up an enterprise for several months past, which, if successful, will be of great importance to the material interests of Oregon and Washington Territory. Mr Ferry is [illegible] of the ultimate success of his scheme, and his object in getting to Washington is to labor earnestly in its behalf, and induce men of capital to become interested in the important enterprise. Ere this Mr Ferry is doubtless on his way to the national capital and will soon be followed by his family.

NEW THEATRICAL COMPANY.—To-day Mr I. C. White will take his departure on the outgoing steamer for San Francisco whither he goes for the purpose of making arrangements to secure a good theatrical company. If he succeeds, a season will shortly be inaugurated at New Market Theater. We are pleased to chronicle the fact that such an arrangement is on foot, and join in the sincere hope that success may crown the efforts which are being put forth to furnish our amusement loving public an opportunity to enjoy the legitimate drama during the coming winter months. Should Mr. White secure a good company, we are certain that a dramatic season would meet with a fair and remunerative measure of public patronage.

DAMAGE TO THE BLANCHE.—Further telegraphic advices were received yesterday from the British bark *Blanche*, which was compelled a few days since to put in at Esquimalt in a stress of weather, having a portion of her rigging carried away. The vessel was pretty roughly handled by the gale during the continuance of which the cargo was shifted about the bark thrown on her beam ends and lost her topmast. On being righted the vessel put in at Esquimalt for repairs. No damage is been sustained by the cargo so far as is known. The damage done the rigging can be repaired without much expense to the owners or delay to the vessel.

THE LECTURE.—"Citizen" writing from Vancouver, says "The effort of Judge Bronaugh at the Methodist chapel, in this city (Vancouver) on Wednesday evening of this week, was one of the rare treats of the season. THE CONCERT.—This evening the McGibeny family will give a vocal and instrumental concert at New Market Theater. The song services given by the McGibeny family have drawn together very large audiences and given great satisfaction. One attractive feature will be the addition of two professional musicians Profs. Bray and Roos who will assist during the evening and furnish some excellent instrumental music.

The entertainment will consist of readings from a number of the most eminent poets. Prof Bray has been engaged for the evening and will furnish excellent music between the recitations. Miss Holbrook received her elocutionary education from the great tragedian, James E. Murdoch, and comes to us with the highest encomiums from the press and public. She has given readings with much success in the cities of the East also in San Francisco and other places on the Pacific Coast. All lovers of the elocutionary art should hear the lady.

INAPPROPRIATE HYMNS

[From the Rev Edwin M Long's History of Hymns and their Authors]

Utter thoughtlessness is sometimes manifest in the announcement of unsuitable hymns. On a bright Sabbath morning a pastor gave out the expressive evening hymn commencing:

Savior breathe an evening blessing
Ere repose our spirits seal

During the preaching of a farewell sermon by a clergyman the people were so melted [illegible] with emotion and the speaker was so much affected that he was scarcely able to proceed. Calling up a minister to [illegible] the service the latter announced the hymn:

Jesus we lift ourselves to Thee
Thy Holy Spirit breathe
And let this little infant be
Baptized into thy death

In some churches the choirs are permitted to sing their own voluntaries with which to close the service. At the funeral of a distinguished alderman of Massachusetts the choir sang of their own accord:

Believing we rejoice
To see the curse removed

The Upper Wallamet is reported falling quite rapidly, but is still at a good boating stage.

The Aurora Restaurant has been improved greatly within the past few days through the efforts of fresco painters and other artists and presents a much more inviting appearance than formerly. The ladies' dining saloon is neat and attractive and can be reached without any inconvenience. Messrs Rider & Hersey must be doing a large business. They deserve it all as they give thorough satisfaction to their numerous patrons. Be sure and call at the Aurora Front and Alder streets.

No extra charge for reserved seats. Go to McCormick's for them. Go early.

The new cutter recently engaged by Fishel & Roberts is giving thorough satisfaction to the numerous patrons of that house. The firm are to be congratulated. The invoices opened this week are very attractive.

CASSIAR GOLD FIELDS.

The steamer *California* from Fort Wrangel arrived at Victoria en route for Portland on last Sunday, bringing 180 passengers and at least $250 000 in Cassiar gold dust. E. A. Booth of Victoria brought about $7 000 obtained on Dease creek. Other miners had from $400 to $6 000 each. There were no "broke" men on board. The new discovery on Styyca creek and other tributaries of the Deloire are attracting great attention, and will be the point of attraction next year. The Discovery Company on McDame creek brought down about $1 800 to the share. The new strike on Thibert's creek promises largely. In the Deloire country there are hundreds of thousands of acres of auriferous ground not yet taken up. The *Colonist* received by the *California* a letter from Telegraph creek, Stikine, dated Oct 17 which states that the quantity of gold dust passing that point in the hands of Dease creek merchants during the fall has been as follows: Wright Nelson & Calbreath about 500 pounds of dust. [illegible] & Co 200 pounds. Foster, 100 pounds. Bliss & Co 150 pounds. Smith & Co 100 pounds. Martin & Hart 100 pounds. Butchers saloon keepers and small traders 300 pounds. Making in all about 1 300 pounds weight of gold, or $260 000 worth taken by a few merchants. It must be remembered that the above did not all come out of Dease Creek as these traders supplied other small creeks who had not population enough to support a store. The same letter says: "The amount taken down by miners I cannot give you any estimate of but I have not noticed a single man going down without money. A friend of mine informs me that a colored man by the name of Booth has taken out of a gulch about six miles up Dease Creek $9 000. The Moore boys have made enough out of their claim this year to build another steamboat to run from Victoria to the boundary line next season, which I we all hope will be the case. The [illegible] are satisfied [illegible] [illegible] tributary of [illegible] pay [illegible] $50 to $100 per day to the hand. The Discovery Company McDame's creek is paying from 150 ounces to 250 ounces per week. Last week they had 230 ounces. The Walsh Company from 50 to 75 ounces. B[illegible] Company 70 to 100 ounces and several other paying well. It is also reported that a [illegible] below McDame's creek rich diggings have been struck. In conclusion I have not the least hesitation in saying that I believe we shall have at least 5 000 men here next season."

Greet the McGibenys with an overflowing house to-night.

FRIDAY MORNING, NOVEMBER 5 1875

CITY.

Arrest of Supposed Stage Robbers.—Mr J A Pruett, sheriff of Umatilla county, informs the evening cotemporary that the supposed stage robbers were arrested several days ago, and are now undergoing examination at Pendleton. The circumstances of their detection and arrest directed by Col H C Paige Wells, Fargo & Co's agent, are about as follows One of the supposed robbers by the name of Maxon came into Weston a few days prior to the time when the stage was stopped and traded a horse with a stable-keeper there The horse he received was newly shod all round at his direction After the work performed by the blacksmith was completed Maxon purchased a lot of provisions and started off with the statement that he was bound for Vancouver direct. After the robbery had been committed, and when heavy storms had been raging in the mountains for two or three days, Maxon accompanied by another man by the name of James Berry, who is said to be very respectably connected in Walla Walla valley returned to Weston It was quite evident from the general appearance of the men that they had been driven into town from the mountains by bad weather; and from the fact of their strange and sudden appearance from an uninhabitable region the new shoes having been removed from the horse when the animal most needed them to retain a foothold the man purchasing a pair of boots and hiding his own shoes, (the shoes fitted the tracks made by one of the robbers at the scene of the robbery) and the men a few days before pleading poverty now flush with money, led those in search of the robbers to believe they had found the highwaymen, and the sheriff proceeded at once to arrest them They were at once confined in the jail at Pendleton and the trial had progressed far enough to develop the points given above.

Found Guilty.—Yesterday afternoon the attention of the State circuit court was occupied in the trial of the two lads Johnny Dougherty and Charles Carroll who are charged with the crime of larceny from a dwelling in connection with George Connor and Willie Reynard After a short deliberation, the jury returned a verdict of guilty as charged in the indictment. Fair and impartial trials have been had, convictions secured in the case of each of these defendants, and nothing now intervenes between the lads and the penitentiary. All that remains for the court to do is to pass sentence against these boys and the doors of the penitentiary will close upon them, except something is done by our citizens at once toward establishing a reform school, Should such an institution be founded, these youthful offenders can easily be transferred from the penitentiary to the reform school. All right thinking persons must admit that while it is neither proper nor right to permit such bad boys to run unrestrained about the streets, yet offended justice scarcely warrants the incarceration of lads of such tender years in the penitentiary. Mr Thompson, the district attorney, as a sworn officer of the law had no alternative but to prosecute these boys and under the evidence, the jury could not consistently do otherwise than to adjudge them guilty. Whether these lads are to be committed to the State's prison or sent to a reformatory institution will depend solely on the [illegible] action of our citizens with reference to the subject of establishing a reform school. Where shall these children be sent?

Brutally Assaulted.—A Chinese lad named Ah Duck was set upon yesterday by a boy named Elkeles, who drives an express wagon, and brutally maltreated Elkeles, while standing near the corner of Alder and [illegible] streets, threw a stone at the boy which [illegible] hitting him Ah Duck picked up a stick with which to defend himself and prepared to stand on the defensive Without the slightest provocation Elkeles hurled another stone at the lad, who did not escape so fortunately. The missile struck him square in the forehead, inflicted a deep gash, and knocked him senseless for a few minutes. Seeing what he had done, the young ruffian took to his cowardly heels and ran away Complaint was filed at police court against Elkeles and the [illegible] started after him but the young hoodlum had made his escape and up to a late hour last evening had not been arrested Elkeles is viciously disposed and has a bad reputation

An Enterprise on Foot.—Mr C D Ferry, who formerly lived in Portland, but who for several years past has been a resident of Tacoma, is now in San Francisco en route to Washington, where he expects to remain during the coming winter. We understand that Mr Ferry has been indefatigably engaged in building up an enterprise for several months past, which, if successful, will be of great importance to the material interests of Oregon and Washington Territory Mr Ferry is quite sanguine of the ultimate success of his scheme, and his object in getting to Washington is to labor earnestly in its behalf, and induce men of capital to become interested in the important enterprise Ere this Mr. Ferry is doubtless on his way to the national capital and will soon be followed by his family

New Theatrical Company.—To-day Mr P C White will take his departure on the outgoing steamer for San Francisco whither he goes for the purpose of making arrangements to secure a good theatrical company If he succeeds, a season will shortly be inaugurated at New Market Theater We are pleased to chronicle the fact that such an arrangement is on foot, and join in the sincere hope that success may crown the efforts which are being put forth to furnish our amusement loving public an opportunity to enjoy the legitimate drama during the coming winter months Should Mr. White secure a good company, we are certain that a dramatic season would meet with a fair and remunerative measure of public patronage.

Damage to the Blanche.—Further telegraphic advices were received yesterday from the British bark *Blanche*, which was compelled a few days since, to put in at Esquimalt in a stress of weather, having a portion of her rigging carried away The vessel was pretty roughly handled by the gale during the continuance of which the cargo was shifted about the bark thrown on her beam ends and lost her topmast. On being righted, the vessel put in at Esquimalt for repairs No damage has been sustained by the cargo, so far as is known The damage done the rigging can be repaired without much expense to the owners or delay to the vessel.

The Lecture.—"Citizen," writing from Vancouver, says "The effort of Judge Bronaugh at the Methodist chapel, in this city (Vancouver), on Wednesday evening of this week was one of the rare treats of the season In touching upon the prophecies he displayed great familiarity, and showed himself master of the situation As citizens and church members we extend to the Judge our most sincere thanks for his able lecture The attendance was good and the entire proceeds were turned over to the church"

Renominated.—A regular meeting of the members of Multnomah Engine Co, No 2 was held last evening when the following resolution was adopted "That Multnomah Engine Co., No 2 appreciating the efficient and impartial manner in which A B Hallock has discharged the duties of chief engineer of the P F D during his first term of office thereby commending himself to the support of the fire department for a second term does hereby cordially nominate him for that position

Held to Answer.—Ah Lang a old celestial was arrested on Wednesday night charged with the larceny of a number of articles Among the articles purloined by the Chinaman were a handkerchief and a pistol When Ah Lang was brought into the police court and the stolen articles produced he waived an examination and was held to answer the charge before the grand jury [illegible] fixed at $250 and not being able to furnish the same the defendant was [illegible]

Rescue—Occident.—For some time past the boiler of the steamer *Rescue* has been in a leaky condition and yesterday it was determined by the company to temporarily withdraw that boat from the Portland Milwaukie [illegible] in order to enable the required repairs to be made The new and handsome steamer *Occident* took the route and will continue to run on it till the *Rescue* is ready to [illegible] service again

The year now in its last quarter has been one of very great reverses in the financial and commercial world and one who has read carefully the news of the many failures occurring almost daily in Europe and America will not be surprised to know that the number of these failures foots up large or that the amount involved is great. The Mercantile Agency of R G Dun & Co have long been regarded as the best authority on the question of statistics in this regard and their report for the first nine months of the current year is before us by favor of Mr Stiles their agent in this city. From it we learn that the number of failures in the United States during the first three quarters of this year was 5 834 and the liabilities $131 17 000 against 4 371 failures in three quarters of 1874 in which the liabilities were $110 429,000 and 3 887 failures in three quarters of 1873 and $171,574 000 liabilities. But the year last named was a peculiarly unfortunate one as the increase both as to the number of failures and the amount involved was nearly double that of the preceding year.

The showing made by the report for Oregon is not a bad one and indicates an improvement in business and a better state of commercial matters toward the close of the year. The failures in Oregon for the first three months of the year were five in number and $88 930 in amount. In the second three months, eight failures and $114,800 while in the quarter ending the 30th of September last there were only two failures reported the amount involved being only $7 400; making a total for the nine months of fifteen failures and $210 148.

Breadstuffs Market.

The number of ships arriving under charter to load wheat and flour for Europe will necessarily induce a very large movement toward tide-water within the next few weeks and boat men are making the amplest preparation to bring down the large surplus in store along the river hitherto locked up for want of convenient transportation. The daily receipts at this point are rapidly increasing already and with plenty of water in the Wallamet they are likely to be kept up. A general disposition to sell at current rates is hardly manifest among farmers but still exporters are able to secure large quantities and have in sight sufficient for present necessities. The market shows no fluctuations though it might be counted weak at our quotations which are still paid for fair-average lots.

The flour market rules steady at the former figures and the trade is quite brisk heavy shipments to San Francisco, British Columbia and Puget Sound being noticed. Mill men claim that present quotations are too low for the price of wheat, but the markets abroad will hardly justify any advance here at present, and it is better to keep their mills going with quick sales and small profits, than to allow the mills to lie idle or stocks to accumulate. The local trade is quite brisk. A thousand barrels of [illegible] were sold to-day at current rates.

Liverpool Wheat Market.

The following is our special cablegram of wheat quotations direct from Liverpool.

LIVERPOOL, Nov 4, 1875.

OREGONIAN, Portland. To day's Liverpool wheat market closed as follows Oregon wheat, ex warehouse from 11s 3d to 11s 7d per cental. California club, ex warehouse from 11s 4d to 11s 8d per cental. Oregon cargoes afloat on passage to the United Kingdom offers at 11s 1d to 11s 6d per cental. Market falling.

HENRY JUMP & SONS.

The above figures indicate a general decline of 2@3d per cental on all classes since our telegram last week.

Domestic Produce

Generally is quite firm, though articles in which there is merely a local trade are in abundant supply and such bear correspondingly low prices. Oats are still coming forward very slowly so slowly in fact that some dealers are inclined to believe that the surplus in the State is very short, and while not extremely so it is quite certain that the quantity for shipment is below the average for Oregon. Mill feed is in fair supply but the approach of winter and a good demand for shipment induces firmness on part of dealers who are well supplied. Hay is unchanged. Potatoes and onions show a little better feeling but scarcely enough to justify any change in quotations. Dairy products meet with ready sale and the demand for choice butter and cheese is active. Bacon is coming forward quite freely for the season and is steady at last week's figures which are repeated. The supply of beef cattle, mutton and hogs is ample to meet the demands of the trade. Eggs are slightly fluctuating and shippers are disposed to lower their offers to 40 cents per dozen though a good many have been placed, during the week, in the way of local trade at 45 cents. Ripe fruit of [illegible] varieties are abundant and it is almost an impossibility to give quotations for apples or pears which could be relied upon, as prices depend on the quality of the fruit and wants of buyers.

The salmon fisheries on this coast will eventually become a leading interest at its present rate of growth. The arrival of 1 000 barrels of this fish from Prince of Wales Island is a new item in the line. The fish from that section are much smaller and not quite so fat as the Columbia river salmon but are still regarded as very fine. Messrs Corbitt & Mackay own a fishery on the island and this is their [illegible] consignment.

Shipping Intelligence.

The steamship John L. Stephens will sail for San Francisco at 1 P M to-morrow.

The steamship California is delayed on the sound and probably will not reach here until Sunday.

The Am bark Geo Moon with about 600 tons of assorted mdse from San Francisco reached her berth at Flanders wharf this morning and began discharging at once.

The Br ship Loch Fleet arrived at Greenwich dock this morning and is discharging ballast.

The bark Herbert Black, having most of her cargo out is taking on wheat.

The Br ship Lanarkshire has cleared for Liverpool.

The steamship Ajax from San Francisco will sail for [illegible] and at noon on Saturday.
